

Survivor-Lite Tactical Vest

The Survivor Vest series is Capewell's new and innovative vest design. This new concept integrates vest and flotation collar into one assembly. This design eliminates common problems experienced by aircrew with traditionally designed vests such as collar rub, neck fatigue, and hindered range of motion while wearing a flight helmet. The vest is a combination of fire retardant webbing and the new advance nomex / kevlar hybrid cloth providing robust wear resistance and fire retardancy.

FEATURES & BENEFITS

- One size fits most
- Minimum 44 lbs. of buoyancy
- Single bladder inflated with one 40gm CO2 cartridge. (Dual bladder available)
- Built in survivor locator light
- Survival whistle included
- MOLLE pocket mounting system
- Low-profile flotation with superior flotation angle
- Weighs just 2.63 lbs.
