

NEW! ASU Lightweight NVG system E3

Lighter

- <380 grams => minimum 30% less weight than current fielded systems =>
 - reduced pilot neck load and head ache = improved crew health
 - Less pilot fatigue
 - Higher mission safety

Tougher

- More durable, military-grade aluminum and titanium construction

Easier to operate

- Highly intuitive adjustment and focus
- Collimation set for life => less cost for service, higher mission safety
- Backward compatible with legacy ANVIS mounts and battery packs
- Fewer parts for less maintenance

Superior

- Highest available EMI/EMC shielding
- Increased eye-relief
- Better depth perception
- Greater unaided look under, look-around peripheral field of vision
- Available in multiple FOM, Non Auto-gated/Auto-gated, Green or white Phosphor
- Certified to new TSO standard for NVGs, TSO-C164a
- Patented technology and design
