

## ASU Lightweight NVG system E3

### Lighter

- Less than 400 grams => 30% less weight than current fielded systems => reduced pilot neck load

### Tougher

- More durable, military-grade aluminum and titanium construction

### Easier to operate

- Highly intuitive adjustment and focus
- Collimation set for life
- Backward compatible with legacy ANVIS mounts and battery packs
- Fewer parts for less maintenance

### Better

- Highest available EMI/EMC shielding
- Better depth perception
- Greater unaided look under, look-around peripheral field of vision
- Available in 1600/1800 FOM, Non Auto-gated/Auto-gated, Green or white Phosphor
