This data sheet is for an EXPORT CONTROLLED PRODUCT. The export of these products and technical information related to these products is governed by the U.S. Department of State International Traffic in Arms Regulations (ITAR) and/or the Department of Commerce Export Administration Regulations (EAR). Non-Sales Technical Data related to these products must not be transmitted to a foreign person/entity without proper authorization of the U.S. Government. Violations may result in administrative, civil, or criminal penalties. ITAR/EAR Export Licenses and/or ITAR/EAR Brokering Licenses (as appropriate) will be required prior to submittal of any further technical information and/or shipment of samples and/or products.

ABOUT SHOTSTOP

U.S.-based ShotStop Ballistics is developing the lightest, thinnest, and strongest advanced armor technologies in the world. From body armor plates and armored vehicle protection to its innovative BallisticBoard® material and custom armor solutions, ShotStop Ballistics is leading the way in improving the protection of our police, military, special forces, S.W.A.T., security personnel, and more. With technical expertise that spans the last 35+ years, the ShotStop team brings together engineers, Ph.Ds, chemists, product developers, and ballistic specialists to create ballistic technology that saves lives, reduces restriction, and maximizes performance. ShotStop consistently uses independent and federally accredited ballistic labs, including the Department of Defense and National Institute of Justice, to ensure ShotStop armor positions our servicemen and women with the best possible protection.

ABOUT SHOTSTOP

U.S.-based ShotStop Ballistics is developing the lightest, thinnest, and strongest advanced armor technologies in the world. From body armor plates and armored vehicle protection to its innovative BallisticBoard® material and custom armor solutions, ShotStop Ballistics is leading the way in improving the protection of our police, military, special forces, S.W.A.T., security personnel, and more. With technical expertise that spans the last 35+ years, the ShotStop team brings together engineers, Ph.D.s, chemists, product developers, and ballistic specialists to create ballistic technology that saves lives, reduces restriction, and maximizes performance. ShotStop consistently uses independent and federally accredited ballistic labs, including the Department of Defense and National Institute of Justice, to ensure ShotStop armor positions our servicemen and women with the best possible protection.

LIFESAVING BALLISTICS TECHNOLOGIES®

BALLISTICBOARD®

MADE WITH

DURITIUM

TECHNOLOGY

- Ultra Light • Ultra Thin • Warranted Performance • Hand Gun & Rifle Protection •

BallisticBoard®, made with Duritium® technology, is an ultra light, ultra thin ballistic material that is developed and manufactured in the USA to withstand multiple shot impacts from handgun and rifle fire. The BallisticBoard insert (soft and rigid) and clipboard are perfect for placing in a backpack, computer bag, luggage, or purse to turn it into instant ballistic protection. Tested by NIJ certified laboratories to exceed national industry standards, BallisticBoard is your answer to safety, security, and the confidence that you or your loved one is protected.

Soft BallisticBoard

Rigid BallisticBoard

Backpack Insert

Ballistic Clipboard

BallisticBoard and Duritium technology can be engineered for almost any custom ballistic application, from classrooms and furniture to retail environments and vehicle armor.

BALLISTICBOARD APPLICATIONS
